Profile Summary

I am a Computer Science student at Binus University, class of 2025, with a strong interest in web development. I have 1.5 years of experience as a web developer intern in banking and telecommunications, focusing on building and improving internal company applications. I am especially interested in front-end development and keep improving my skills through real projects. I work well in teams, stay responsible under pressure, and always strive to improve my skills.

- **SQL (Basic)** *2023*
  Hacker Rank
- **Front-End Development** *2023*
  BNCC

Work Experience

IT Developer at CIMB Niaga *July 2025 - Present*

- Internal Web App (Vue, TypeScript) – Improved an internal web tool by upgrading existing features based on user requests and building data dashboards that followed given designs and user requirements.

Intern Developer at Telkom Indonesia *February 2025 - July 2025*

During my internship, I contributed to three internal projects using modern web technologies:

- AI Showcase Redesign (Next.js, TypeScript) - Redesigned Telkom's AI Showcase website to improve UI/UX and responsiveness.
- Internal Web App (React, TypeScript) - Built a web application for internal operational use with a focus on clean UI and efficient data handling.
- Audio Transcription App (Vue, Docker) - Developed a web-based tool to transcribe audio in real time using Vue and Docker.

Intern IT Developer at CIMB Niaga *February 2024 - February 2025*

- Internal Web App (Vue, TypeScript) - Assisted in frontend development for a web-based internal tool using Vue and TypeScript.
- Automation & Location Service (Golang, Docker) - Built a backend service to fetch and update data automatically, and another service to provide information based on user coordinates using Go and Docker.

Education

Bina Nusantara University *2021 - 2025*

Computer Science | GPA 3.48
